

ADONIS[®] Community Edition
Free BPM Tool

<http://www.adonis-community.com/>

ADONIS:Community Edition is a free version of the leading BPM tool ADONIS. It is aimed both at users new to business process management, who need an **intuitive tool for documenting processes**, as well as experienced BPM practitioners, who want more sophisticated options such as process **simulation, performance monitoring, and risk management** support.

<http://www.adoit-community.com/>

The ADOit:Community Edition is a free version of ADOit – the professional enterprise architecture tool by the [BOC Group](#). We are a technological leader in IT-based management tools and offer consulting services in the areas of IT Management, Strategy and Performance Management and Business Process Management.

OMILAB[®]

<http://www.omilab.org>

A research and experimental laboratory for the conceptualization, development and deployment of modelling methods and the models designed with them.

Conceptual Modelling Methods: Classics

ER

| BPMN

| UML

| EPC

<http://www.omilab.org/web/guest/omilab-in-education/cmmc>

The *Conceptual Modelling Methods: Classics* (CMMC) tool is a collection of "classical" modelling languages employed in different domains, e.g. software and systems modelling, business process modelling, and data modelling. The tool aims to be support university teachers in basic conceptual modelling courses. CMMC currently supports the following modelling languages:

- **Business Process Model and Notation 2.0 (BPMN)**
- **Event-driven Process Chains (EPC)**
- **Entity-Relationship (ER)**
- **Unified Modeling Language 2.0 (UML)**
